

## Community Association Industry Trailblazers: Becker Continues to Deliver Cutting-Edge Technologies

June 13, 2019

We at Becker pride ourselves on bringing innovative business solutions to community associations. It is in this spirit that we were the first to bring online voting to Florida associations and why we continue to deliver cutting-edge technologies with the most advanced, yet easy to use, functionality.

**[BPBALLOT.com](http://BPBALLOT.com)**

Three years ago, we launched online voting platform BPBALLOT which has since revolutionized community association voting by helping to facilitate and increase member participation for countless communities throughout Florida.

In order to continue to provide a state-of-the-art experience for our BPBALLOT clients and friends, we are excited to announce that we've recently partnered with a new software developer who is currently hard at work to bring a more robust and user friendly "VERSION II" of BPBALLOT to market by September 1st. During this transitional period, voting will be temporarily unavailable.

We look forward to helping your board achieve important goals which require membership approval when we release VERSION II this fall. In the interim, please [click here to sign up for launch updates and exclusive discounts!](#)

Following on the heels of BPBALLOT, Becker in partnership with digital developer SHYFT, launched [MyCommunitySite.com](http://MyCommunitySite.com), a website development service that allows community associations, both large and small, to seamlessly create and maintain their own cutting-edge and compliant websites. Benefits of the website development service for condominium associations include no upfront development cost, same-day website turn around, a low monthly

subscription fee, comprehensive support packages, automatic updates, cutting-edge technology and design, and freedom from third parties and hidden costs.

As a Board Member or Property Manager with responsibilities over many communities, [MyCommunitySite.com](#) is a one-stop website development solution! [Click here to learn more.](#)
